It is important that your website be listed near the top. But how do you get your website at the top?

Through a strategy called SEO, Search Engine Optimization.

When a user enters a search into an engine,

the engine asks a list of questions to every website.

Then engine then ranks the websites based on the answers to these questions.

The website that answers the most questions ranks the highest in the results.

SEO is the process it takes to make sure your website can answer the most questions.

Make sure your website gets found with SEO.
